

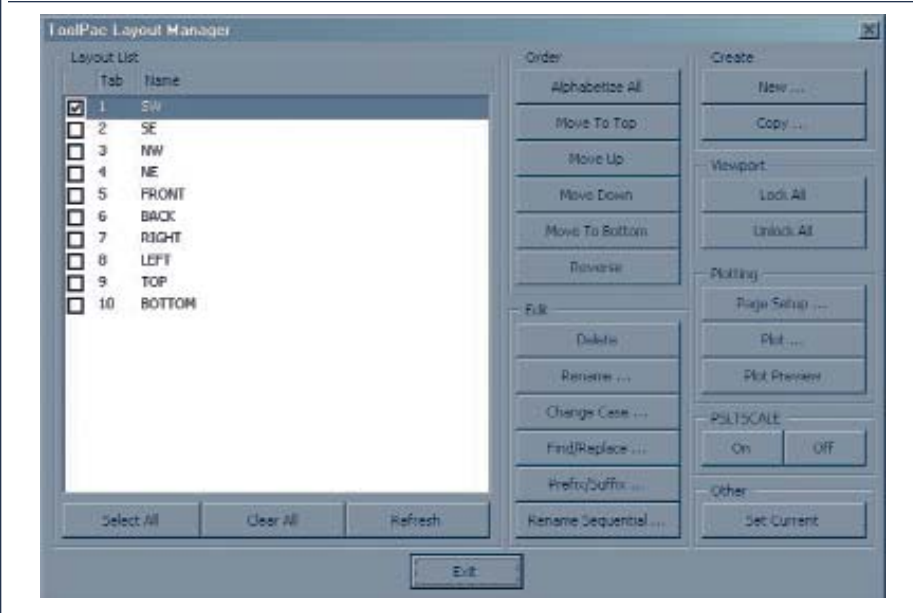

Figure 5. Layout Manager Dialog Box

ToolPac 7.0: \$195

Requires AutoCAD 14, 2000–2002 (LT not supported)
 DotSoft, 606/849-4312, fax 606/849-3145, sales@dotsoft.com, www.dotsoft.com, 3390 Morehead Road, Flemingsburg, KY 41041

Repath: Easily repaths xrefs by picking

Bind: Binds xrefs by picking.

ToolPac’s “Check for Updates” tool allows users to connect to DotSoft’s Internet server for revised files that in one click can bring their system up to date with all patches.

I don’t have enough space here to review all of the tools, but I think you will find ToolPac to be a wonderful addition to your office that will quickly pay for itself. ■

continued from page 17

layer, linetype, thickness, ltype scale, current, or all; breaks objects by other objects or object snaps; copies objects to another layer

- **Pline:** Opens or closes a selection set of polylines
Auto Connect: Automatically connects points and blocks to form new polyline
- **Table**
Create New: Creates a new table. Specifying the number of rows and

columns brings up a table editor that is similar to a spreadsheet. This alone is worth the price of the program!

- **Text:** ToolPac has a complete set of text tools, including Align (to any justification), Break (at pickpoint, word, into columns), Set Height by copy or scale, Rotation (copy, absolute, relative) Import/Export text, and much much more.
- **Xref Manager:** Provides dialog-based xref management
